

REACH COMPLIANCE STATEMENT

The European Union legislation entitled "Registration, Evaluation, Authorisation and Restriction of Chemicals", Article 33 of Regulation No 1907/2006 – entered in to effect On June 1, 2007. The REACH regulations require registration (with some exceptions) of every chemical substance imported into the European Union in quantities greater than 1000 kg. The obligation to register the materials is on the individual or entity actually manufacturing or importing such material in Europe.

Since Dow-Key is an article (component) producer, the products we supply shall not release any substance under normal or reasonably foreseeable conditions of use. Therefore, according to the legislation, specifically Regulation (EC) 1907/2006, Title II, Chapter 1, Article 7.1 (a) and (b), it is Dow-Key's understanding that the products Dow-Key sells constitute **non-registrable articles for their intended and anticipated use**. Additionally, Dow-Key products do not contain any Substances of Very High Concern (SVHC) as found in the most current candidate list and as defined in Article 33 (1) & (2) "Substances of Very High Concern" EC Title VII, Chapter 1 Article 57. The SVHC candidate list can be found at <http://echa.europa.eu/candidate-list-table>. These are in compliance to current REACH Directive 2011/65/EU, and the additional substances per EU Directive 2015/863.

Please contact Sharon Lynch, Quality Manager, for any questions regarding REACH compliance.
